SUMMARY

Software Engineer with 5+ years of experience in architecting and delivering high-performance applications across web, mobile, and backend platforms. Expert in frontend development using **React, Next.js, Vue, and Nuxt**, with a strong focus on building reusable component systems and scalable UI architecture. Proficient in cross-platform mobile development with **Flutter and React Native**, and experienced in designing resilient backend services using **Golang and Node.js**. Proven track record in implementing Domain-Driven Design (DDD), help mentor and collaborate engineering teams, and collaborating with stakeholders to deliver high-quality software solutions.

EXPERIENCE

Freelance Software Engineer

Freelance **December 2020 - Present**

- Delivered high-quality software solutions on time and within budget.
- Streamlined development processes, reducing project timelines by 25%.
- Collaborated with cross-functional teams to enhance product functionality.
- Optimized existing code, improving performance by 50%.
- Worked across React, Vue, Angular, Next.js, Nuxt, React Native, Flutter, and multiple database systems.

Front End/Mobile Engineer

PT Roketin **March 2023 - January 2026, Indonesia**

- Help and contribute Frontend architecture initiatives using DDD, including project skeletons and shared tooling.
- Lead and help Frontend development that focused on responsive, production-ready user interfaces.
- Help mobile development using React Native and Flutter.
- Built and maintained enterprise systems such as CMS platforms, reinsurance systems, loan management solutions, and real-time applications.
- Developed scalable applications using React TypeScript, Next, Vue, and Realtime like websocket/socket.io.
- Established reusable component libraries and enforced code quality standards using Sonar.
- Conducted code reviews, mentored engineers, supported deployments, and collaborated with stakeholders.
- Developed reusable UI components and improved frontend performance.

Frontend Engineer

Pajakku **May 2022 - February 2023, Indonesia**

- Implemented modern frameworks, increasing development speed by 40%.
- Integrated APIs seamlessly, enhancing functionality and user interaction.
- Optimized front-end performance, reducing load times by 50% on key pages.
- Implement and renewed old mobile development project with React Native.
- Developed reusable UI components and improved frontend performance.

Front End Engineer/Lead Frontend Engineer

INAGRI **June 2021 - June 2022, Indonesia**

- Led a team to deliver high-quality web applications on time.
- Optimized performance, reducing load times by 40%.
- Collaborated with cross-functional teams for seamless integration.
- Developed reusable UI components and improved frontend performance.

Fullstack Developer

Purwadhika Digital Technology School **April 2021 - June 2021, Indonesia**

- Integrated third-party APIs, expanding application functionality seamlessly.
- Implemented responsive designs, enhancing mobile user experience significantly.
- Collaborated with cross-functional teams, improving project delivery speed.

EDUCATION

Fullstack Web & Mobile Development

Purwadhika Digital Technology School • Indonesia • 2020

- Learn Fundamental of Javascript, HTML, CSS, ReactJS & React Native
- Learn Back End development in NodeJS, ExpressJS, MySQL & MongoDB

Bachelor's degree, Agribusiness/Agricultural

Universitas Padjadjaran • Indonesia • 2019 • 3.53

SKILLS

Language: TypeScript, JavaScript, PHP, SQL

Frontend: React, Next, Vue, Nuxt, Angular TS

Backend: Golang, Express, Nest

Mobile: React Native & Flutter

Databases: MySQL, SQL Server, MongoDB
